# Governor's Executive Budget

## IN BRIEF

FISCAL YEARS 1990-1991

TED SCHWINDEN, GOVERNOR

MONTANA STATE LIBRARY

3 0864 0010 1639 6

## PRUDENT DECISIONS PAY OFF

As a result of "holding the line" on budget increases for the past three years, the 1989 legislature does not face the \$100 million annual shortfall that confronted legislators during the June 1986 special session or the \$100 million biennial "gap" between revenue and expenditures that faced legislators in January 1987. Rather, the Executive Budget for FY90-91 recommends a budget that is balanced without the necessity for a tax increase, one that requires less than one-half the fund transfers needed over the last three years, and which allows for increased spending for human services, education, and state institutions. It provides for an increase in state employees' pay to be funded by improved efficiency in state agencies.

## SURTAX REMOVED

The Executive Budget recommends that the 10% income tax surcharge be allowed to expire at the end of 1988. This surcharge was imposed on a temporary two-year basis to deal with the revenue shortfalls the 1987 Legislature faced. Now that prudent budget decisions, an improving economy, and increased state revenues have helped move expenditures and revenues closer together, it is time to remove this temporary tax.

## A BALANCED BUDGET - CLEAR PRIORITIES

Overall, the Executive Budget for FY90-91 proposes spending \$1.281 million less in general fund for agency budgets than we are spending this biennium. It would ensure a prudent ending fund balance of \$16.675 million. However, it recommends increased spending for important "people" programs. In each year of the biennium the budget contains funding for a 2% increase in state support for the foundation program, a 2% increase for state employees, and a 2% increase in the rate paid to those who provide services to Montanans using state social and medical programs.

These increases are possible because of good management. The budget proposes a 9.72% increase in general fund spending for education, a 6.79% increase for human services, and a 2.18% increase for state institutions. The expenditures for other agencies are reduced by 10.56%. The 2% state employee pay raise is possible because state managers have found ways to do their work more efficiently.

Authorized FTEs have decreased by 464 since Governor Schwinden took office in 1981. The decrease in state employees per capita is more dramatic, from 18.49 state employees per thousand Montana residents in 1981 to 17.33 in 1989. This budget would continue the trend by reducing FTEs by an additional 145 from the FY89 authorized level.

As we progress toward bringing revenues and expenditures in line, we must continue a modest level of fund transfers. The recommended total for FY90-91—\$37.6 million—is substantially less than the \$100 million that is being transferred this biennium. By the end of next biennium, further fund transfers should be unnecessary.

The budget also continues the practice adopted in FY87-FY89 of slowing our rate of savings. The budget recommends that 100% of the interest earned on the coal tax trust will be used for ongoing expenses of government for the next two years. (The budget proposes no change in the allocation of coal tax revenue to the permanent trust—50% of all coal tax revenue will continue to be deposited into the trust.) Beginning in FY92, 15% of the interest will be deposited in the trust.

The Executive Budget recommends eliminating the earmarked coal tax for the Coal Board/Local Impact Program,

and supporting the program at a reduced level with a general fund appropriation. This program was established in 1975 when experts predicted that coal production would exceed 50 million tons per year and there would be 21 coal fired generators within our borders by 1985. Today, with no new mines or generator plants on the horizon and local infrastructure needs in the area largely met, priorities have changed. The budget recommends reducing the Coal Board staff from 2.5 to 1 FTE and funding to \$375,000 per year for problems that may arise in the impact area during the next biennium. The coal tax funds freed by this decision will be placed in the School Foundation Program, benefitting students throughout the state. However, the budget recommends keeping the Coal Board Program in place, so that it can respond to future impacts when significant coal development once again occurs.

## SCHOOL FOUNDATION PROGRAM

The budget proposes providing \$51.5 million to the School Foundation Program. Primarily because of declining state-wide taxable value, the Foundation Program requires \$34.754 million in additional general fund to maintain the current foundation schedules. The 2% annual increase recommended in this budget requires an additional \$16.745 million. In order to help fund this single largest increase in general fund spending, the remaining balance in the Education Trust, \$9.575 million, is transferred to the School Foundation Program in FY91. In addition, the budget recommends utilizing the coal tax funds that would have been deposited to the Education Trust and the Park Acquisition Trust and the funds earmarked for the Coal Board to help fund the Foundation Program. These recommendations provide the Foundation Program with \$25.493 million of additional coal tax funds over the biennium. The remainder of the needed \$51.5 million is provided with a \$25.306 million general fund appropriation and \$0.7 million of additional earmarked revenues.

## BUDGET INITIATIVES

The Executive Budget proposes important new budget initiatives in key areas:

—Montana Conservation Corps The budget proposes an innovative new program that will assist in the protection, conservation, and improvement of Montana's parks while providing valuable work experience for unemployed or economically disadvantaged youth and adults. In cooperation with the Departments of Labor and Industry and Social and Rehabilitation Services, the Department of Fish, Wildlife and Parks the budget proposes to spend \$595,465 during the next biennium for a year-round adult corps unit and a summer youth corp unit. Participants in the program will assist in priority projects such as erosion control, weed control, trail and landscape improvement, and site maintenance. To be eligible for the program, individuals must be economically disadvantaged, seeking employment through the Job Service (or the Human Resource Development councils for summer employment), and be physically and mentally capable of performing labor-intensive outdoor work.

—Corrections Programs Based on the recommendations of the Criminal Justice Advisory Council's year-long study, the budget proposes appropriating \$425,876 during the biennium to the Department of Institutions for expansion of the intensive supervision program. This will allow district courts to place in community-based intensive supervision programs 75 prisoners who would have otherwise been sentenced to Montana State Prison. This type of program, which is prov-

## BUDGET HIGHLIGHTS

ing successful in many other states, is a cost-effective way of reducing prison populations and rehabilitating offenders. The budget also includes \$215,712 over the biennium for expansion of the sex offender treatment program at the prison. Sex offenders comprise a growing segment of the prison population, and existing programs cannot provide treatment to all those who need it. Lastly, the budget proposes \$1.184 million for construction of a new housing unit at the prison. The current facilities, built to house 744 prisoners, now house 990 prisoners. The Department of Institutions estimates that prison population will grow to 1,040 in FY90 and to 1,077 in FY91. Additional capacity is needed to house these prisoners. To keep costs down and provide work experience to prisoners, the prison addition would be constructed with inmate labor.

—Active Treatment at the Montana Developmental Center The budget proposes the addition of 18.5 new FTEs at the Boulder Montana Developmental Center to enhance the active treatment program for residents and to ensure the state maintains medicaid certification.

—Day Care The budget proposes the addition of \$125,000 per year of general fund to the Department of Family Services to help develop day care resources in the state and ensure that existing day care centers meet federal licensing standards. The federal welfare reform act will require the state to take a more active role in day care and these funds will ensure that the state is prepared to meet the new federal mandates.

—Foster Care The budget includes \$735,752 for the biennium to allow the Department of Family Services to develop additional community programs to help troubled youth. The programs will provide needed services to keep children in their homes, rather than moving them into foster homes. Services will be added based on consultation with local advisory councils.

—Obstetric Care in Rural Areas Recognizing the serious problem of ensuring adequate obstetrical care in rural areas, the budget proposes a two-pronged approach. Based on the recommendations of the Governor's Obstetrical Services Availability Council, the budget proposes increased medicaid reimbursement for delivery of babies. It includes a 2% provider rate increase, which SRS will be authorized to allocate among provider rates based on need. In addition, the budget proposes an additional \$100,000 for the biennium be appropriated to SRS for targeted reimbursement increases for medicaid deliveries. Second, the budget proposes expanding prenatal education and medicaid coverage for expectant mothers. In accordance with the federal Catastrophic Care Act, the budget proposes \$5.9 million for the biennium (\$1.7 million in general fund) for medicaid coverage of children under one year of age and pregnant women whose income is less than the poverty level. The budget also includes \$65,000 per year of general fund to expand the Department of Health and Environmental Science's prenatal education programs and \$50,000 per year additional general fund for Family Planning prenatal counseling.

—Priorities for People (PFP) This innovative program, which won an award from the American Public Welfare Association in 1988, invites consumers and providers of human services to review the human service budgets and make recommendations to the Governor on priorities for increased expenditures and for reductions in services. This year, the program was expanded to include human service programs in five agencies—SRS, DHES, DFS, Institutions, and Labor. The 35 members of the PFP team met for seventeen days, held informational hearings in seven cities, and submitted a comprehensive recommendation to the Gover-

nor. This budget includes 8 of the top 11 PFP recommendations for increases in services.

—Gaming Commission Based on the intensive study made by the Gaming Advisory Council, the budget proposes a Montana State Gaming Commission that will regulate all forms of gambling except the state lottery and horse racing. The Commission would have 3 new FTEs, with gambling enforcement provided by the Investigation Division of the Department of Revenue. The cost of this new program would be paid for by fees and taxes collected from gambling.

—Science and Technology Alliance The Executive Budget for FY88-89 recommended—and the 1987 legislature adopted—a \$15 million bonding program, backed by the permanent coal tax trust fund, to expand this important economic development program. Earlier this year, the Montana Supreme Court held the bonding program to be unconstitutional. This budget recommends a \$2 million appropriation from the Coal Tax Permanent Trust for the Science and Technology Alliance. This meets the objections raised in the Supreme Court decision and ensures that this important program will have funds to invest in Montana's high technology businesses.

—Fire Protection This budget proposes including the remaining 10 counties in the state-county cooperative fire control agreement over the next three biennia. During the 1991 biennium, Deer Lodge, Flathead, and Ravalli counties will be added at a cost of \$130,000 of general fund. In addition, the budget proposes that the state assume fire fighting responsibility for "Block 4." This requires that we add \$398,522 of general fund and 12.25 FTEs.

—Rest Area Maintenance To improve maintenance at Montana's six major rest areas and to enhance our tourism efforts, 9.6 FTEs will be added to the Department of Highway's budget for the biennium.

## FEDERAL MANDATES

The federal government has passed legislation in several areas—welfare reform, nursing home care, AIDS prevention, catastrophic health care, national defense, and remediation of leaking underground storage tanks and superfund sites—that impose new duties on the state. In some cases, adequate federal funding came with the federal mandate; in other cases—welfare reform, and nursing home regulation, in particular—it did not. As a result of these federal mandates, an additional \$6,743,401 in general funds are included in the budget.

—Catastrophic Health Care The Catastrophic Care Act expands medicaid coverage. The estimated general fund cost for the biennium is \$3,568,309. Pregnant women and women with children under one year old, with incomes less than 100% of the federally established poverty level, are now eligible to receive medicaid.

The state must also expand eligibility for payment of medicaid insurance premiums, known as medicare part B premiums. The state now pays such premiums for medically needy individuals, but now must extend coverage to all persons eligible for medicare, whose incomes are below 100% of the federally established poverty level.

The act also establishes resource limits for spouses of individuals in nursing homes. Those provisions will increase the cost of medicaid by reducing the amount spouses are now required to pay.

—OBRA The Omnibus Budget Reconciliation Act mandates new requirements for all nursing homes and requires new

regulatory functions for state government as a condition for maintaining medicaid funding. The budget proposes \$1,571,244 of general fund for the biennium to meet the new requirements. DHES will have new responsibilities for maintaining a registry of nurse's aides, inspecting doctors labs, and increasing the level of inspection of nursing homes. The Department of Institutions will have to comply with the requirement to provide a minimum of 75 hours of training to all nurse's aides. SRS's medicaid reimbursement must increase to cover the additional costs private nursing homes incur as a result of the new training requirements.

—Federal Welfare Reform Federal welfare reform mandates additional medicaid coverage and new day care benefits for AFDC recipients. Job training requirements have been added which will be handled by the Department of Labor. While there are some anticipated savings from reductions in AFDC caseload, the increased costs of one year of additional medicaid coverage for those recipients finding work and up to a year of additional child care increase the state's net general fund cost by \$1,156,929. The new work program will cost an additional \$446,919 of general fund for the biennium.

The state will also have expanded child support enforcement responsibilities. The budget proposes a \$92,700 supplemental in FY89 and the addition of two FTEs in the 1991 biennium to meet the new requirements.

—National Defense. During the next three years, the federal government will increase the number of National Guard personnel in Montana by 800 and provide associated new equipment and new buildings. In order to provide state match for this expansion, the budget proposes \$139,900 in general fund each year.

—AIDS Prevention To meet our expanded responsibilities under federal law for AIDS education and testing, DHES would receive 6 additional FTEs and \$1,273,497 additional spending authority for federal funds in the budget proposal.

—Superfund Remedial Investigations/Feasibility Studies During the 1990-91 biennium, there will be \$4.9 million of federal funds available to continue the superfund efforts in Montana. The budget authorizes expenditure of these funds, as well as the addition of 14 new FTEs.

—Leaking Underground Storage Tanks The program is designed to take remedial action on leaking underground storage tanks where there is no identifiable responsible party or the responsible party is insolvent. The federal funds must be matched 90/10 with state funds. The budget proposes using Resource Indemnity Trust funds already earmarked to DHES for the state match. The budget includes \$1,478,102 total funds for the biennium and 5.5 FTEs to implement the program.

## TAX REFORM

Included within the budget is a revenue-neutral tax reform package that makes Montana taxes simpler and

fairer and makes Montana more competitive in attracting jobs and industry to this state. This proposal has three major elements:

—Income Tax Reform The proposal lowers the top marginal tax rate from 11%—which is the highest marginal rate in the country—to 8%. The proposal also broadens and simplifies the tax structure, so that most taxpayers will be able to file a simple, single-page form instead of the numerous forms required under current law. In order to increase tax equity and make the proposal revenue-neutral, the deduction for federal income taxes is limited.

—Personal Property Taxes Eliminated The proposal eliminates nearly all personal property taxes, removing a tax that discourages business expansion and new investment in the state. Because assessment of personal property taxes is also very labor-intensive, elimination of most personal property taxes allows a reduction of 52.2 FTEs in the Department of Revenue in FY91 and a biennial general fund savings of \$1,195,594. The revenue lost from elimination of these taxes is generated by a replacement tax placed on associated real property.

—Nuisance Taxes Repealed Several taxes currently imposed under state law—such as the store license tax—cost more to administer than they produce in revenue. In addition, such taxes burden Montana taxpayers with more paperwork. This proposal will repeal these “nuisance taxes.” The revenue reduction from the repeal of nuisance taxes is only \$306,000 per year.

## SCHOOL FUNDING PROPOSAL

One of the major issues facing the 1989 legislature is equitable funding of Montana's primary and secondary education systems. Earlier this year, a district court held that Montana's current public school financing system violates Montana's constitution because it denies students both equal protection of the laws and equality of educational opportunity. The decision gave the Montana legislature until October 1, 1989, to correct these deficiencies. This decision is currently being appealed to the Montana Supreme Court. A decision is not expected until the 1989 legislative session is underway.

At the Governor's request, the Public School Financing Advisory Council prepared a proposal for the consideration of the 1989 Legislature. The proposal simplifies school finances by consolidating seventeen separate statutory accounts into two, a general fund and a capital improvement fund. The proposal equalizes 85% of school expenditures and places an expenditure limit on per student expenditures. Local voted levies would be eliminated in 50% of all school districts and limited by the expenditure cap in the rest. Funding would be equalized through a 140 mill statewide levy. The Foundation Program payments would be increased to 216% of the current schedules to equalize funding. Further details on this proposal are published in the separate report of the Council.

## Revenue Adjustments

The following paragraphs describe each revenue adjustment proposed in the Governor's Executive Budget proposal.

### Individual Income Tax

The Executive Budget recommendation for the Department of Revenue includes two individual income tax modifications which are designed to enhance collection efforts. Total revenues anticipated are \$1.369 million and \$2.073 million in FY90 and FY91, respectively. The general fund will receive 58.2% of these amounts or \$.797 million in FY90 and \$1.207 million in FY91.

### Interest on Investments

The Revenue Estimating Advisory Council did not assume the state would issue tax and revenue anticipation notes during FY90 and FY91. Based on the level of disbursements recommended in the Executive Budget, it is assumed that the general fund will be cash deficient during each year of the 1990-91 biennium. Thirty million dollars in short-term notes are anticipated to be issued annually.

### Long-Range Bond Excess

This category of revenue receives 10% of individual income tax receipts. Due to the proposed modifications to enhance individual income tax collections, this component will receive 10% of the total or \$.137 million in FY90 and \$.207 million in FY91.

### Coal Trust Interest Income

The Executive Budget recommendation proposes to change the distribution of permanent trust fund interest earnings. Under current law 15% of total earnings are deposited to the trust fund. The Governor's budget diverts the 15% of permanent trust interest earnings to the general fund for FY90 and FY91.

### Public Institutions Reimbursements

The Executive Budget recommendation for the Department of Social and Rehabilitation Services includes modifications for provider rate increases and the Omnibus Budget Reconciliation Act of 1987 (OBRA). If patient costs at state institutions are medicaid reimbursable, then the federal revenues received are deposited in the general fund.

### Other Revenue Sources

Revenue adjustments included in this component are as follows :

	<u>FY 90</u>	<u>FY 91</u>
Bingo and Keno Taxes	\$ .300	\$ .300
Agricultural Fees	.132	.132
Statewide Cost Allocation Plan	.464	.467
Elimination of Nuisance Taxes	<u>-.281</u>	<u>-.281</u>
Total	<u>\$ .615</u>	<u>\$ .618</u>

Each of these adjustments are the result of proposals contained within the Governor's Executive Budget.

## Revenue Adjustments

The following paragraphs describe each revenue adjustment proposed in the Governor's Executive Budget proposal.

### **Individual Income Tax**

The Executive Budget recommendation for the Department of Revenue includes two individual income tax modifications which are designed to enhance collection efforts. Total revenues anticipated are \$1.369 million and \$2.073 million in FY90 and FY91, respectively. The foundation program will receive 31.8% of these amounts or \$.435 million in FY90 and \$.659 million in FY91.

### **Coal Severance Tax**

The Executive Budget recommendation proposes to change the distribution of coal severance tax revenues. Under current law 6.65%, 7.60% and 1.90% of total receipts are deposited to the local impact account, education trust account and parks acquisition trust account, respectively. The Governor's Executive Budget proposal diverts all of these revenues to the foundation program for the support of public schools.

### **Education Trust Interest**

The diversion of coal severance tax revenues from the education trust account to the foundation program reduces the investable balance of the education trust account. With less funds available for investment, interest earnings from the investment of these funds are reduced.

The Executive Budget proposes a level of FTE in state government in FY91 that is the lowest since FY75. The proposed FY91 level is more than 1400 FTEs less than in FY77 and 738 FTEs lower than the authorized level in FY86. The proposed FTEs in FY91 are 609 fewer than in 1981 when Governor Schwinden took office. This decline takes place even though the Executive Budget includes over 100 additional modified FTEs required as a result of new federal programs and requirements.

The decline in FTE is even more dramatic when the new services that have been added over the years are considered. Passage of the lottery initiative added 35 FTEs. The new forensics building at Montana State Hospital added 30 FTEs. Assumption of the Vo-Tech system added 246 FTEs in FY82 even though the level of service remained the same. Additional housing and inmate levels at Montana State Prison have added 88 prison guards. State Lands assumption of fire fighting responsibility from the federal government has added 41 FTEs since FY84.

Despite these additions, the total number of FTE in state government has declined and the number of FTE per capita in Montana has declined significantly. Table 1 and the following graph depict the number of state employees per 1000 residents since 1972. Table 2 lists FTE by agency for FY88 actual, FY89 approved and FY90-91 as proposed in the Executive Budget.

### Compensation

The Executive Budget proposes that state employees receive a 1.7 to 2.3 percent increase in total compensation from FY89 to FY90 and an additional 1.7 to 2.7 percent increase in total compensation from FY90 to FY91. The lower grades in the statewide salary schedule receive the largest percent increases in total compensation while the higher grades receive the lowest percent increase. This increase in compensation will provide for an increase in the state contribution for group insurance from \$1380 per year in FY89 to \$1500 per year in FY90 and to \$1680 per year in FY91. It also provides for an increase in the base salaries of state employees of 1.5% in FY90 and an additional 1.5% in FY91. The Executive Budget proposes that the full amount of the increase be placed on the base salaries and that employees remain at the step they occupy as of June 30, 1989, for the 1991 biennium. New employees will move from step one to step two at the end of their probationary period.

With this proposed increase in FY90 and FY91, a grade 8 employee's cumulative pay increase from FY81 to FY91 has exceeded the cumulative increase in the Consumer Price Index (CPI) over the same period. A grade 12 employee's cumulative pay increase has nearly matched the increase in the CPI and a grade 16 employee's cumulative pay increase has fallen slightly behind the CPI. The following graph shows the cumulative pay increases from FY81 to FY91 for a grade 8, 12 and 16 employee and the cumulative CPI over the same period.

The Executive Budget proposes that the increases in compensation be funded from within each agency's current level appropriation. Under current law, agencies have program transfer authority of up to 5% of the total agency budget and also have the authority to transfer unexpended appropriation balances from the first year of the biennium to the second year for the purposes of offsetting the costs of pay increases in the second year. This will allow agencies the necessary flexibility to fund the pay increases within their appropriations.

## SCHOOL FOUNDATION PROGRAM

21

The school foundation program is increased by 2% in each year of the biennium. Primarily because of declining state-wide taxable valuation, \$34.754 million is necessary just to maintain the existing schedules. The 2% annual increases recommended in this budget require an additional \$16.745 million. The total cost is \$51.499 million.

The budget proposes to fund the increases by allocating to the Foundation Program coal tax revenues earmarked to the Coal Board, and the coal tax revenues that would otherwise be deposited to the Education Trust and the Park Acquisition Trust. In addition, the remainder of the Education Trust principal, \$9.575 million is appropriated to the Foundation Program in FY91. These allocations provide \$25.493 million dollars. A general fund appropriation of \$25.306 million is also recommended. (The remaining \$0.700 million is provided through increased earmarked revenues due to increased audit collections.)

### Foundation Schedules and CPI

Foundation Program schedules have more than kept pace with inflation since FY81. Table 1 and the accompanying graph illustrate the growth in the Consumer Price Index and the School Foundation Program schedules from FY81-FY91. During that ten year span the Consumer Price Index has increased by 48.75% while foundation schedules have increased by 58.86%.

### "The Loble Decision"

One of the major issues facing the 1989 legislature is the Loble decision which held that Montana's current public school financing system violates Montana's Constitution because it denies students both equal protection of the laws and equality of educational opportunity. The decision gave the legislature until October 1, 1989 to correct these deficiencies. This decision is currently being appealed to the Montana Supreme Court. A decision is not expected until the 1989 legislative session is underway.

The Foundation Program Budget is presented under current law. Both the Executive Budget and the Office of Public Instruction have recommended changes in the Foundation Program to address the Loble decision. Both of them recommend that any changes be implemented in FY91, leaving the existing School Foundation Program intact in FY90. Because school districts have to adopt FY90 budgets and submit proposed levies for voter approval prior to the end of the 1989 session, it would be difficult for the legislature to resolve the issue in time for a FY90 implementation.

The current law revenue estimates and expenditure requirements for the Foundation Program will serve as the basis for legislative consideration of proposals to address the Loble decision.

Table 1
